

Report of Joint Research

Member: Suguru Yanata (Wakayama University, Japan),
Inga Malinauskaite (Mykolas Romeris University, Lithuania)

Theme 1: Development of Financial Education and Cyber Security - The
Link between Technological Development and Education -

Theme 2: Cyber Security Risks for Internet Banking and Management of
Financial Institutions

This joint research has been done for 2 weeks from 18 January to 1 February in 2016. Members are Suguru Yanata and Inga Malinauskaite. Mainly this research was proceeded to add information about legal aspects among cyber security and privacy issue of internet banking which Malinauskaite expertise on a Yanata et al's existing research paper about financial education.

As a result of this joint research, both members found that it was not enough only to add some information but also wrote a new research paper. Then both members tried to write, and we could be able to write a new paper. This will be submitted to peer-reviewed international journal or conference in a few months. Further, another joint research project has begun containing other researchers of Wakayama University. Both members are going to proceed this new project.

As an outcome of this joint research, both members also identified the global risk issues of cybersecurity, which are actual and have great impact on the internet business and banking area. This topic is new and should be analyzed more in order to reveal undiscovered scientific facts.
